THE INCREDIBLE FIVE

A CHEETAH'S TALE

Cheetahs are the high-speed hunters of the Savannah. Few attempt to take on larger prey than gazelles or smallish antelopes. But on occasion, the predatory cats reveal a surprisingly different side. In the Northern Serengeti, a group of male cheetahs emerges and turns all we know about them upside down. Males are usally loners or live in small groups, but here we have five tomcats hunting together as one. It is actually, the largest alliance of the animals ever seen! This film has many stories to tell about the sleek hunters.
